Fareed Haque

Return to the *Joyous Lake* Tour

Celebrating 50 years of Pat Martino's *Joyous Lake*, featuring original Joyous Lake drummer Kenwood Dennard and the vinyl release of *Return to the Joyous Lake*.

1977 → 2027 | feat. Kenwood Dennard | New on vinyl

50 YEARS OF JOYOUS LAKE

Released in 1977, Pat Martino's *Joyous Lake* is a defining chapter from one of jazz guitar's most distinctive voices, fusing electric energy, sophisticated composition and adventurous improvisation.

The project grew from conversations between Haque and Martino about recording new interpretations of the original material. With Martino's blessing, Haque arranged all six compositions, drawing on their harmonic richness and improvisational possibilities.

After Martino's passing in 2021, the project became a lasting expression of respect, friendship and gratitude. Original Joyous Lake drummer **Kenwood Dennard**, first a consultant and now a participant, brings first-hand insight and a living link to the 1977 album.

Pat, Fareed and his son Elihu after dinner, before the jam...

> *"Fareed Haque has been in the forefront of our instrument's evolution for quite some time, and these recent recordings bring us up to date with an impact that's memorable. Bravo Fareed!"*

THE RECORDING

Return to the Joyous Lake

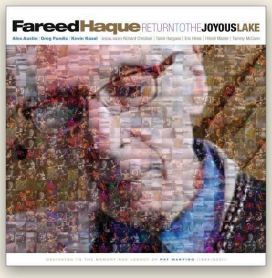

Haque's arrangements strike a balance between individual expression and respect for Martino's vision, carried by his regular band and an adventurous circle of guests, from tabla to Mongolian throat singing, letting this influential music resonate with a new generation of listeners.

> *We lost Pat while we were working on this project, and it was heartbreaking for all of us. Out of respect we chose to delay the release but we were honored to present the entire Joyous Lake album at his celebration of life Nov, 2022 with Kenwood even sitting in on a few tunes.*
